

Working Safely near Pipelines & Pipeline Infrastructure

Course Outline:

A one day course for anyone who works near pipelines, near or within facilities, or other pipeline infrastructure.

The course provides an explanation of the methods, precautions and procedures which are required to work safely near pipelines and their associated assets.

The course details the roles and responsibilities of various parties when working near pipelines. It also describes common good working practices and procedures which apply. The use of work permits and hazard analysis is described, as well as some basic knowledge of petroleum behaviour, how to respond in an emergency, and what common requirements pipeline operators may impose on works.

Learning Outcomes:

- Understand the laws and regulations which govern working around pipelines and how these laws are enforced
- Gain an appreciation for the hazards of working with petroleum, know how it behaves and what you can do in an emergency to keep yourself and others safe
- Know the standard procedures and practices which are normally used when working on a pipeline, a pipeline easement, or inside a pipeline facility
- Understand the importance of following procedures and keeping records

Intended audience:

Contractors, Foremen, Supervisors, Construction personnel, Engineers and anyone else who works within or around pipelines or associated infrastructure in the oil and gas industry.

Course Content/Session Titles:

- Topic 1 – The Law
- Topic 2 – Pipes and Petroleum Basics
- Topic 3 – Good Work Practices
- Topic 4 – Hazard Identification and Control
- Topic 5 – Records and Procedures

Number of participants: maximum 12 (in public schedule)

Duration: 1 day
